

Dose to Data App Store Screenshot Gallery

iPhone 6.5-inch creative handoff | Revised App Store screenshots

Revision note: Yellow highlighting marks updated copy and visual direction.

Purpose: Present Dose to Data as a calm, understandable medication and symptom-tracking tool, with each screenshot focused on one clear user benefit.

Creative direction

MyTherapy: [Pill Reminder - MyTherapy](#) informed the concise, benefit-led storytelling and the idea of adding motion later.

Bearable: [Bearable - Symptom Tracker](#) informed the soft gradient backgrounds and approachable visual hierarchy.

Dose to Data interpretation: Use varied blue, mint, lavender, blush, and peach gradients while keeping the app UI itself clear and inspectable.

Recommended gallery order

Order	Primary message	App view
01	Turn daily check-ins into clear trends	Insights
02	Make check-ins your own	Daily check-in
03	Your week at a glance	Today
04	Never miss a dose	Schedule
05	Your metrics. One daily score.	Check-in detail

Key App Store decisions

Preview video: Apple places App Preview videos before screenshots on iPhone, even when they are rearranged. Keep this gallery screenshot-only if the trends-led message must remain first. [Apple upload guidance](#)

Device coverage: The current app target supports iPad, so a separate 13-inch iPad screenshot set is also required. [Apple screenshot specifications](#)

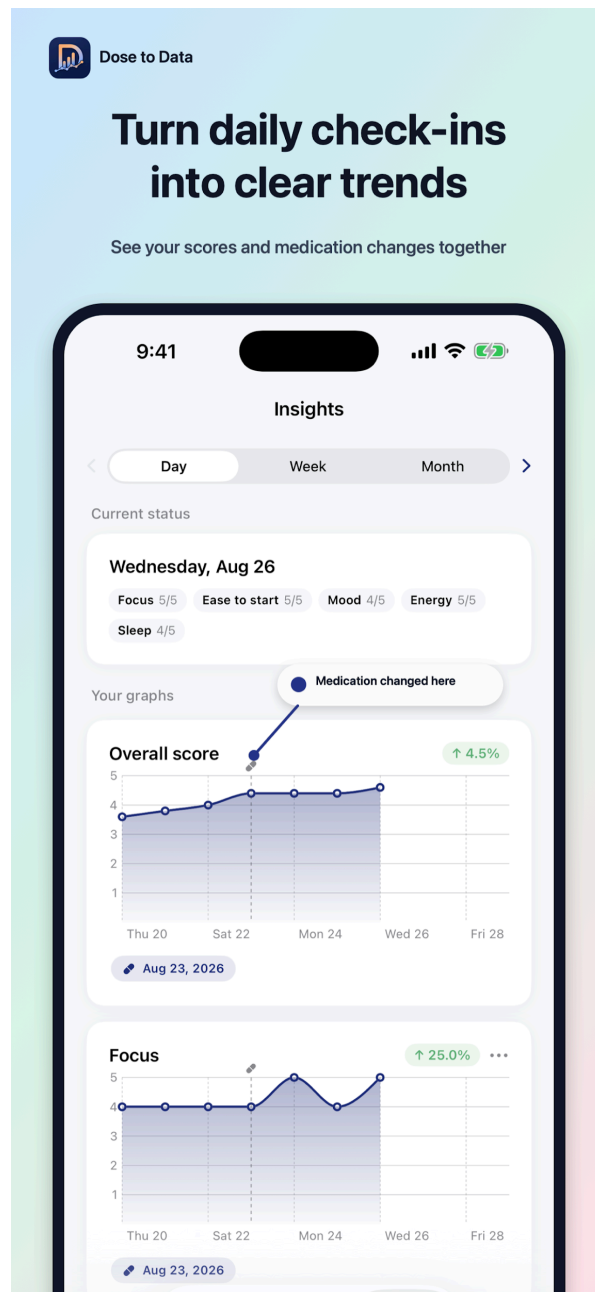

File validation: 1242 x 2688 px, RGB, no alpha; representative demo data only.

01: Turn daily check-ins into clear trends

What it communicates: Lead with clear trends and label the medication-change marker directly on the chart.

App view: Insights

UPDATED: Added a label pointing to the medication-change marker on the chart.

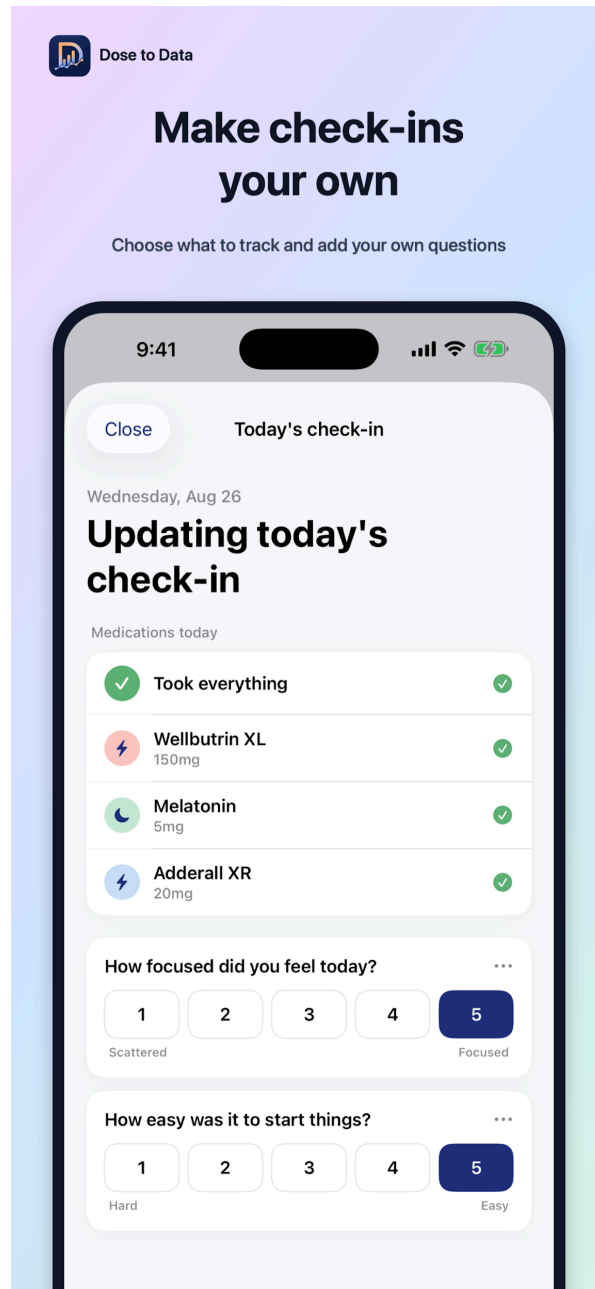

Upload asset: 1242 x 2688 pixels, portrait, RGB, no transparency

02: Make check-ins your own

What it communicates: Show that check-ins are personalized, with questions users can choose, edit, and add themselves.

App view: Daily check-in

UPDATED: Shifted the message to personalization and removed the misleading visible CTA edge.

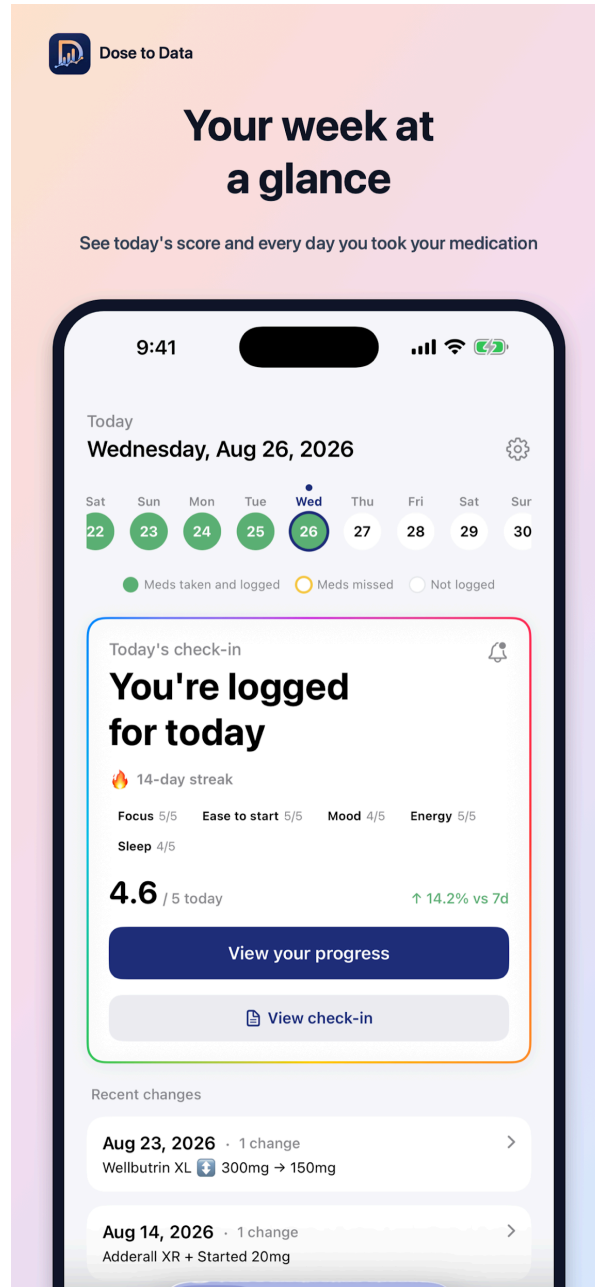

Upload asset: 1242 x 2688 pixels, portrait, RGB, no transparency

03: Your week at a glance

What it communicates: Show today's score and every day medication was taken and logged across the week.

App view: Today

UPDATED: Reframed this screen around today's score and weekly medication adherence.

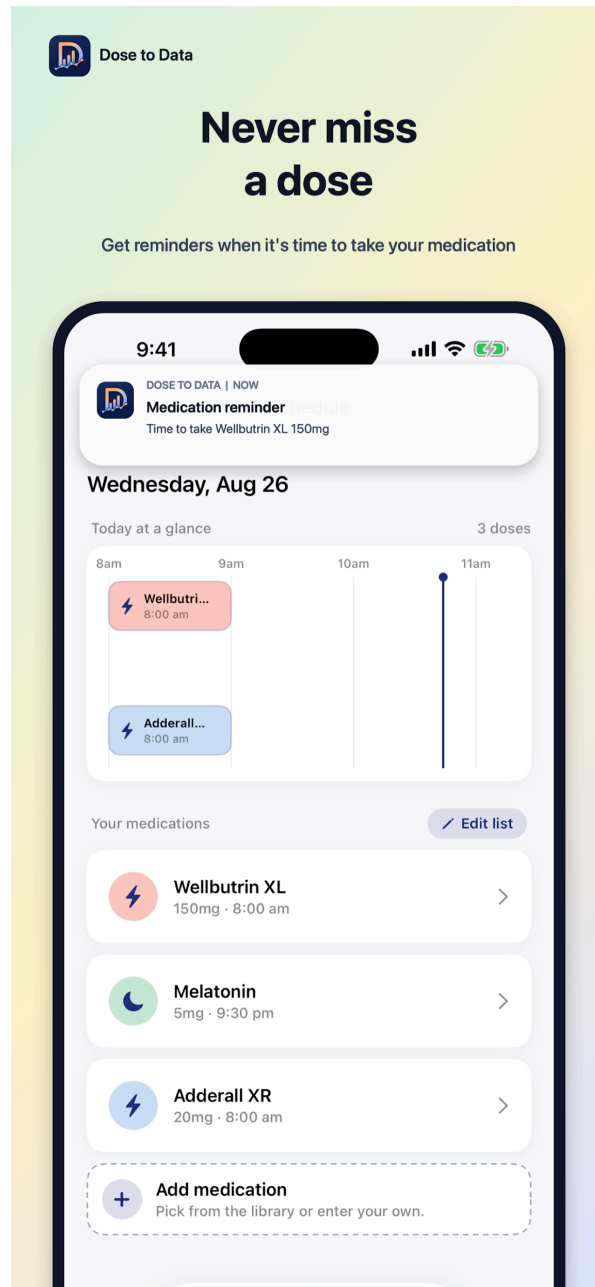

Upload asset: 1242 x 2688 pixels, portrait, RGB, no transparency

04: Never miss a dose

What it communicates: Highlight medication reminders while keeping the daily dose schedule visible.

App view: Schedule

UPDATED: Added a medication reminder notification and changed the message to reminder benefits.

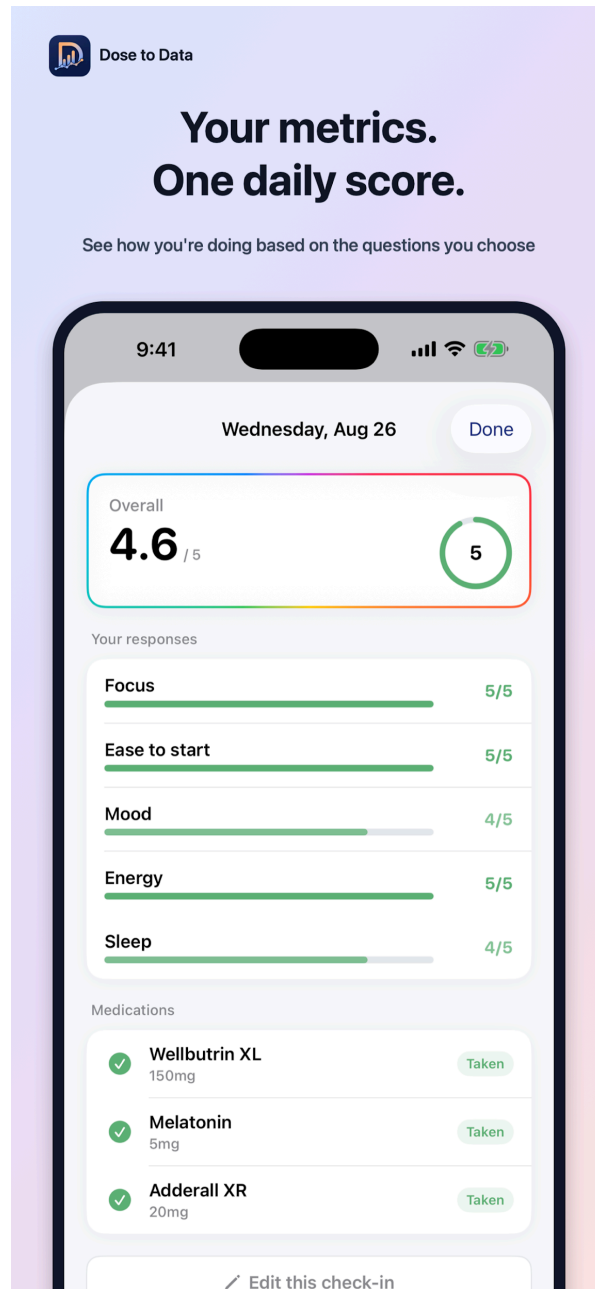

Upload asset: 1242 x 2688 pixels, portrait, RGB, no transparency

05: Your metrics. One daily score.

What it communicates: Show how a daily score is calculated from the specific metrics and questions the user tracks.

App view: Check-in detail

UPDATED: Reframed the screen around a personalized daily score built from tracked metrics.

Upload asset: 1242 x 2688 pixels, portrait, RGB, no transparency
